

Data Section

Data Description

To solve the problem, I will use following data:

- List of neighborhoods in Toronto;
- Latitude and Longitude data of Toronto neighborhoods;
- Venue data related to yoga or other wellness studios. This will help to find the neighborhoods more suitable to open yoga studios.

Sources of the data

- Toronto neighborhoods from Wikipedia;
- Latitude and Longitude data of Toronto neighborhoods from Geocoder package;
- Venue data in Toronto neighborhoods from Foursquare API.
